

AIDA IST telecon, 15 July 2008

Participants: P. Padovani (PP), G. Longo (GL), N. Walton (NW), J. Wambsganss (JW), D. Baines (DB), E. Hatziminaoglou (EH)

Agenda:

- welcome and introductions
 - the role of the AIDA IST, the VO, and astronomical research
 - the AIDA IST and the EURO-VO Science Advisory Committee
 - the "Community Workshop" at ESA (Dec. 2008)
 - the "Hands-on" Workshop at ESO (Apr. 2009)
- ➡Community Workshop @ ESAC, tentative dates: week of Dec. 8th*
- Topic: "Multiwavelength astronomy"
 - The call needs to be sent asap
 - LOC & STOC need to be composed asap. Most IST members will be on it, PP will invite F. Carrera and R. Kennicutt (SAC members, for more details about the Euro-VO SAC see: <http://www.euro-vo.org/pub/fc/sac.html>) and DB will invite a couple of ESAC technical people **
 - [DB] Both galactic and extragalactic cases should be addressed
 - The format of the workshop will be similar to the format of the Spectroscopy workshop held in March 2007 @ ESAC:
<http://esavo.esa.int/SpectroscopyAndVOWorkshopMarch2007/>
 - PP to find out if there are available funds to support young participants
- ➡Hands-on Workshop @ ESO, tentative dates: 30.03.09 - 01.04.09
- (reminder: Easter is on April 12th, NAM+JENAM to take place 19.04.09 - 23.04.09, possibly IVOA interop @ ESO, in April '09)
 - [GL] participants could send proposals about the actual science they would want to carry out but this should not be a requirement
 - [NW] invite people from the research initiative
 - [PP] invite people that are already doing VO science (eg from the list of papers)
 - [GL] broadcast the meeting
- ➡No real need for a face-to-face meeting right now

* Due to various constraints the dates have been fixed to December 1-3.

**Following discussions after the telecon, the following has been suggested: the STOC will consist of 5 IST members (P. Padovani, M. Allen, D. Baines, G. Verdoes Kleijn, E. Hatziminaoglou), P. Osuna and another person on the technical side, 2-3 SAC members and 2-3 external members
