WP6 Plans

# WP6 Plans

- G&WS [UEDIN]
  - Move UWS towards REC status [UEDIN et al]
  - Update CEA UWS implementation to be fully v 1.0 compliant
  - Investigate generic 'DAL publisher' with UWS style module
  - Contribute to the TGC roadmap document

# WP6 Plans

- G&WS [CDS]
  - VOspace 2.0 REST prototype for Victoria Interop
  - Collaboration with UEDIN on security developments
- Registry [UEDIN]
  - Work on registry schema (+ std documentation), particularly VOStandard/VOApplication
  - Document the CEA schema as an IVOA note

# WP6 Plans

- Theory [INAF]
  - Continue standards process for protocol and data model for theoretical data
  - SimDM and SimDAP document note for next Interop.?
  - Evolutionary stellar data accessible via TOPCAT
  - White Dwarf models insert in the public BaSTI DB
  - Refine Science Use Case with VO tools and evolutionary stellar models for a pipeline of comparison observational and theoretical data

# WP6 Plans

- Theory [SVO]
  - Work on SSP (Single Star Population) data models
  - Develop tool(s) to enable them to fit observed galaxy data
