

CDS proposals for WP 3 – WP7

WP3

- ‘French’ registry, help to publishers
- Work on the registry to deal with VizieR tables and with tables which ‘saturate’ the registry
- Customisation and evolution of Aladin for data providers
- Developers’ corner refurbishment
- SAADA, Plastic (or in JRA)

WP4

- Help in AOs - ~1 month
- Want to participate in the feasibility assessment of the proposals
- Suggestion: organise a meeting between the proposers and those who will help them
- Customisation of tools (Aladin), scripts
- Evolution of tools taking into account the needs appearing from the AO

WP5

- Scope has changed because of WWT and Google Sky
- Integration to outreach tools
- Create output of the CDS services in physical units (estimated parameters), for higher education (and astronomers!)
- A few semi-automated tutorials for education (trigonometry, colours)
- Produce nice images to illustrate families of objects
- Outreach page on Euro-VO
- Interested by the Sky Map need!
- Aladin can be programmed by scripts

WP6

- Plastic/Apps
- Registry evolutions to include added-value
- Workflow/Grid
- SSO/iRods
- All work on standards other than DAL and DM
- See F-VO page for Interop summary

WP7

- Provenance (with A. Micol)
- SIA extension (with A. Micol)
- Complex data (Char)
- DAL footprint (with ESO)
